Description	<p>Olive Trade[®] specializes in the production and sales of olive derivative product mix. The company's product portfolio ranges from olives (green, black, pitted, sliced, stuffed) to soap. Our main focus is on high quality olive oil (extra virgin, organic) meeting with international norms, as well as the new aromatized oils line that we launched few months ago. The specialization in olive oil production has been our core family business since the late nineteenth century.</p> <p>Olive Trade[®]'s state-of-the-art production mill, based on the latest three-phase VDP oil extraction system, was imported from Alpha Laval, the renowned market leader, based in Italy. The quality of our produce is ensured by our total control over the production chain process from olive culture to harvest through oil extraction and storage. Olive Trade[®] uses both olives from the family orchards as well as olives bought from the farmers in the surrounding villages of -Akkar- the poorest region in Lebanon.</p> <p>On the retail side, Olive Trade[®] focuses on the niche market of high-end specialized stores in Lebanon and abroad with our exclusive brand “ZEJD”.</p> <p>“ZEJD” (oil in the ancient Phoenician language) highlights the rich historical background of the Lebanese olive oil related to its Phoenician origins.</p> <p>With initial success at introducing “ZEJD” at international shows, Olive Trade[®] expanded its export capabilities; In addition to the French, German and U.S. markets tackled under “ZEJD”, Olive</p>

Trade[®] is targeting the English market through agreements with distributors of equitable gourmet foods.
